

5th Non-Volatile Memories Workshop

La Jolla, California USA

March 9-11, 2014

<http://nvmw.ucsd.edu>

NVMW 2014

Organizers

Steven Swanson, UCSD CSE
Paul Siegel, UCSD ECE/CMRR

Program Committee

Al Borchers, Google
Alexander Driskill-Smith, Samsung
Alexandros Dimakis, UT Austin
Andrew Jiang, Texas A & M
Bipin Rajendran, IIT, Bombay
Bongki Moon, Seoul National University
Brian Kurkoski, JAIST
Chaitan Baru, SDSC
Chao Tian, AT&T Labs - Research
Christophe Chevallier, Rambus
Dalia Malkhi, Microsoft Research
Douglas Santry, NetApp
Edwin Kan, Cornell University
Eitan Yaakobi, Caltech
Ethan Miller, UC Santa Cruz
Hemant Thapar, UCSD
Hironori Uchikawa, Toshiba
Ken Lee, Qualcomm
Maya Gokhale, LLNL
Nitin Agrawal, NEC
Rick Coulson, Intel
Robert Calderbank, Duke
Shruti Patil, Univ. of Minnesota
Sudhanva Gurumurthi, AMD
Research and Univ. of Virginia
Xinmiao Zhang, SanDisk
Yingquan Wu, Tidal Systems
Yitzhak (Tsahi) Birk, Technion
Yuval Cassuto, Technion
Zvonimir Bandic, HGST

The 5th Annual Non-Volatile Memories Workshop (NVMW 2014) provides a unique showcase for outstanding research on solid state, non-volatile memories. It features a "vertically integrated" program that includes presentations on devices, data encoding, systems architecture, and applications related to these exciting new data storage technologies. Last year's workshop (NVMW 2013) included 32 speakers from top universities, industrial research labs, and device manufacturers and attracted over 230 attendees. (The website for NVMW 2013 can be found at <http://nvmw.ucsd.edu/2013>.) NVMW 2014 will build on this success.

The organizing committee is soliciting presentations on any topic related to non-volatile, solid state memories, including:

- Advances in memory devices or memory cell design.
- Characterization of commercial or experimental memory devices.
- Error correction and data encoding schemes for non-volatile memories.
- Advances in non-volatile memory-based storage systems.
- Operating system and file system designs for non-volatile memories.
- Security and reliability of solid-state storage systems.
- Applications of non-volatile memories to scientific, "big data", and high-performance workloads.
- Implications of non-volatile memories for applications such as databases and NoSQL systems

The goal is to facilitate the exchange of the latest ideas, insights, and knowledge that can propel future progress. To that end, presentations may include new results or work that has already been published during the 18 months prior to the submission deadline. In lieu of printed proceedings, we will post the slides and extended abstracts of the presentations online. Presentation of new work at the workshop does not preclude future publication.

Workshop submissions should be in the form of a 2-page presentation abstract. Submissions will be evaluated on the basis of impact, novelty, and general interest.

The submission deadline is December 9, 2013, with notification of acceptance by January 31, 2014.

Further details on abstract submission, technical program, tutorials, travel, social program, and travel grants will be provided at the workshop website:
