CALL FOR PAPERS

The 9th Annual Non-Volatile Memories Workshop provides a unique showcase for outstanding research on solid state, non-volatile memories. It features a "vertically integrated" program that includes presentations on devices, data encoding, systems architecture, and applications related to these exciting new data storage technologies. Last year's workshop included 40 speakers from top universities, industrial research labs, and device manufacturers, and attracted over 230 attendees. NVMW 2018 will build on this success.

The organizing committee is soliciting presentations on any topic related to non-volatile, solid state memories, including:

- Advances in memory devices or memory cell design.
- Characterization of commercial or experimental memory devices.
- Error correction and data encoding schemes for non-volatile memories.
- Advances in non-volatile memory-based storage systems.
- Operating system and file system designs for non-volatile memories.
- Security and reliability of solid-state storage systems.
- Applications of non-volatile memories to scientific, "big data", and high-performance workloads.
- Implications of non-volatile memories for applications such as databases and NoSQL systems

The goal is to facilitate the exchange of the latest ideas, insights, and knowledge that can propel future progress. To that end, presentations may include new results or work that has already been published during the 18 months prior to the submission deadline. In lieu of printed proceedings, we will post the slides and extended abstracts of the presentations online. Presentations of new work at the workshop does not preclude future publication.

Workshop submissions should be in the form of a 2-page presentation abstract. Submissions will be evaluated on the basis of impact, novelty, and general interest.

The submission deadline is Monday, November 27, 2017, with notification of acceptance by Tuesday, January 9, 2018.

Further details on abstract submission, technical program, tutorials, travel, social program, and travel grants are provided at the workshop website:
